## IMMUNOASSAYS

*We are proud that researchers working with BioVendor kits regularly present their results in the highest-ranking life science – examples inside.  
Do you also wish to publish in top journals journals? – Come and join us!*

### **Most recent – up to 2014**

BioVendor released new ELISA kits for the obesity research: Insulin Receptor, Pancreatic-Derived Factor (Pander), Lecithin-Cholesterol Acyltransferase (LCAT). US Patent has been issued to BioVendor on Sept. 30, 2014 for “Method for Determining the Concentration of the Adipocytic Form of the Fatty Acid Binding Protein” (EU patent granted in 2010).

### **When originality and quality matters:**

BioVendor’s focus on keeping high quality standards combined with originality and novelty resulted in a lot of references of the use of such ELISAs as FGF-21, Adipocyte FABP, Chemerin, Vaspin, Omentin, Adiponectin, Resistin, Leptin (human, mouse, rat...).

### **...and history - 1998:**

A long time ago in a laboratory far far away, BioVendor released the first commercial Leptin ELISA kit on the world market...
