BIOTECON Diagnostics

foodproof®

For safer food – BIOTECON Diagnostics – simply builds up trust!

During production, contamination of beer can be recognized by unwanted turbidity due to microorganisms, pH changes, undesired changes of the flavor and protein flocculation. Often, the appearance of beer-spoilage bacteria results in a loss of whole batches of beer. By using the ready-to-use **foodproof® Beer Screening Kit**, 31 species and subspecies of the most troublesome spoilage bacteria can be detected in a single rapid test.

The **foodproof® Beer Screening Kit** is based on real-time PCR technology, which is well-established in the brewing and beverage industry as a highly sensitive and specific detection method.

Fast: 48-72 h to result with < 40 min of hands-on time.

Safe: Prevention of false-negative results by internal control and prevention of carry-over contamination using Uracil-N-Glycosylase.

Sensitive: Validated to detect 1-10 cfu/ml.

Easy: Convenient, complete solution including DNA extraction and real-time PCR analysis.

Experienced: Manufacturer of PCR-based rapid tests for the food industry since 1998 with an ISO 17025 accredited service lab.

Licensed: Fully licensed technology.
