

AID ELiSpot/FluoroSpot Assays

AID offers CE-marked ready to use 96-well plate assays, pre-coated with primary antibody, in a complete kit containing secondary antibody, conjugate and substrate.

In addition, AID also provides a selection of CE-marked ready to use kits for routine diagnostics, specific antigens are already included.

ELiSpot Research Kits - all CE-marked

Customized kits available

Cat-No.	Product	Format
Human		
ELSP5000	Interferon- γ	1 x 96-well plate
ELSP5050	Interleukin-2	1 x 96-well plate
ELSP5060	Interleukin-4	1 x 96-well plate
ELSP5010	Interleukin-5	1 x 96-well plate
ELSP5040	Interleukin-10	1 x 96-well plate
ELSP5082	Interleukin-17	1 x 96-well plate
ELSP5500	Interferon- γ	12 x 8-well plate
ELSP5650	Interleukin-2	12 x 8-well plate
ELSP5660	Interleukin-4	12 x 8-well plate
ELSP5610	Interleukin-5	12 x 8-well plate
ELSP5400	Interleukin-10	12 x 8-well plate
ELSP5682	Interleukin-17	12 x 8-well plate
ELSP5710	iSpot Assay (FluoroSpot) Interferon- γ & Interleukin-2	1 x 96-well plate
ELSP5720	iSpot Assay (FluoroSpot) Interferon- γ & Interleukin-5	1 x 96-well plate
ELSP5730	iSpot Assay (FluoroSpot) Interferon- γ & Interleukin-17	1 x 96-well plate
ELSP5810	iSpot Assay (FluoroSpot) Interferon- γ & Interleukin-2	12 x 8-well plate
ELSP5820	iSpot Assay (FluoroSpot) Interferon- γ & Interleukin-5	12 x 8-well plate
ELSP5830	iSpot Assay (FluoroSpot) Interferon- γ & Interleukin-17	12 x 8-well plate

Cat-No.	Product	Format
Human		
ELSP5210	B-cell EliSpot Assay - IgG	1 x 96-well plate
ELSP5220	B-cell EliSpot Assay - IgA	1 x 96-well plate
ELSP5230	B-cell EliSpot Assay - IgM	1 x 96-well plate
ELSP5310	B-cell EliSpot Assay - IgG	12 x 8-well plate
ELSP5320	B-cell EliSpot Assay - IgA	12 x 8-well plate
ELSP5330	B-cell EliSpot Assay - IgM	12 x 8-well plate
Mouse		
ELSP5025	Interferon- γ	1 x 96-well plate

EliSpot Kits for routine diagnostics – all CE-marked

Cat-No.	Product
ELSP5510	LymeSpot Interferon- γ assay for the detection of Borrelia specific T-cells.
ELSP5520	EBV-Spot Interferon- γ assay for detection of Epstein-Barr-Virus (EBV) specific T-cells. Combination of EBV-lytic and EBV-latent peptide mixes.
ELSP5530	CMV-Spot* Interferon- γ assay for detection of Cytomegalovirus (CMV) specific T-cells.
ELSP5560	TransSpot* Interferon- γ assay for monitoring of transplantation patients and for detection of latent/chronic infections important in terms of a planned transplantation.
